At Work

Strategies for Businesses, Developers, Institutions, or Organizations.

The Chicago region is home to more than 4 million working people, 38 colleges and universities, and numerous Fortune 500 companies. Because of the region's broad range of private activity, Clean Air Counts provides a unique venue for reaching sources not traditionally subject to air quality regulations: such as painting, lighting, and natural landscaping.

CAC outreach focuses on businesses, institutional facilities, such as hospitals, museums, and universities, service sector-based companies, and organizations in the development and building design and construction fields. Since development can affect air quality in many ways, from the establishment of land use patterns to the use of building materials that emit smog-forming gases, CAC also has a dedicated campaign that targets outreach and technical assistance to those who design, develop, build, and manage all types of buildings.

CAC seeks voluntary commitments to implement clean air strategies that have the potential to reduce business operation costs as well as smog. Smog-forming emissions can be reduced by modifying activities at the participating organization as well as by affecting the activities of those doing business with the adopter such as customers or visitors, private contractors, subcontractors, suppliers, clients, and neighboring facilities.

My Reports

Energy Star Office Equipment Reporting

This reporting form is intended to provide the Clean Air Counts Campaign with information about the emission reduction activities of its adopters. The information we collect will allow us to calculate the benefits of each individual action. It may also be used to support air quality planning activities and promote emission reduction strategies in our region.

Update:1/4/2008 12:50:44 PM

Status:Not Complete

[Step 1. Title and information](#)[Step 2. Enter & Submit Worksheet](#)[Step 3. Authorize](#)[Step 4. Confirm](#)

Step 1. Create Mailbox - Create Password (optional)

When finished with each step click the "Continue" button at the bottom of the page. If you wish to save and complete the report later click the save icon. Please Note: Required fields are denoted with an asterics "*".

* Title * Report Year

* Retain Records for 3 years

Disclaimer

Clean Air Act requirements mandate that states must be able to provide documentation for emissions reduction activities up to three years. Therefore, if you would like your emission reduction efforts to count toward clean air goals, you will need to retain records of your activities (e.g. receipts and invoices) for three years.

Status:Not Complete[Step 1. Title and information](#)[Step 2. Enter & Submit Worksheet](#)[Step 3. Authorize](#)[Step 4. Confirm](#)

Step 2. WorkSheet

When finished with each step click the "Continue" button at the bottom of the page. If you wish to save and complete the report later click the save icon. Please Note: Required fields are denoted with an asterics "*".

Use this Worksheet to enter and modify your emissions information. To insert a new emissions record enter the values then click "Insert". To modify an existing record click on in the listing, make the modifications, then click "Update". If you do not know the watts per unit in "sleep mode" of your equipment, you can look it up on the Energy Star website. Select the type of office equipment and download the list of products that qualify.
